I'm trying to pass numeric values too to it. Here's the snippet of the code : ProcessProc.Parameters.AddWithValue("@Id", value)); I get an error like : The data types nvarchar and int are incompatible in the equal to operation. How should I address this? Thanks in advance :) A: Are you sure that you are passing the data as a numeric in your code? So that could be int? If that is the case and you have typed the param as [int], it could be that the data is not a valid numeric value for the param. If this is the case, you may need to cast it to an int or convert it to an int. See for more details of types, conversions, and casting. In the food industry, as in all industries, b7e8fdf5c8
