Filecats Professional Crack+ [32|64bit]

Filecats Professional is a reliable and simple to handle software solution which aims to offer you an alternative method of searching through your computer folders, by enabling you to generate a thorough list of all their contents and export it to an Excel file. Accessible and intuitive usage Once the setup is complete, you will be able to find the application in your shell menu, allowing you to get started with it just by right-clicking the targeted directory and selecting Filecats Professional. Nonetheless, the utility features its own user interface, the main window letting you configure the output options, specifically the metadata to be included in your Excel document. However, bear in mind that having Microsoft Excel installed in your PC is essential for its correct functioning. Effortlessly list the items in your folders to an XLS spreadsheet Filecats Professional provides a fairly comprehensive preferences panel,

enabling you to pick the information you want to be inserted in the output file, for instance 'Standard Metadata', which includes dates, authors, categories or tags, 'Microsoft Office Documents' (with common or less common details). Similarly, you can grab 'Image Data', such as common photo metadata or GPS information, if available, 'Media Metadata' (audio, video or recorded TV) and 'Outlook Metadata' (email, calendar, contact, task, journal, body, or others). Once you have configured the output conditions, you can click on the 'Start' button and within moments, Filecats Professional will export the Excel file, prompting you to save it under a preferred name. The results window also informs you of the number of objects that were processed, the total amount of time it took and the number of items per second that were examined. A comprehensive instrument for cataloging folder contents All in all, Filecats Professional proves to be a handy and efficient program that you can rely on for creating detailed inventories of your directories' contents, saving you valuable time and effort by helping you easily find and work with the documents you need from your PC. MetaFinder is an advanced search program designed to simplify the process of finding files or folders on your computer, by giving you results sorted by metadata, like: date created, date modified, size, file type, content type, name, extensions, tags, categories, color, etc. It works with pretty much any type of file or directory, making it a great tool for finding files you

Filecats Professional License Key Full

- Compatible with MS Excel 2003, 2007 and 2010 - Import/Export to/from XLS - Search by date, authors and categories - Import/Export to/from PDF - Image meta-data and metadata - File size by WinDirStat - Supports multiple images per folder - Download WinDirStat to find hidden files - Multi-Language UI - Extract text from documents - Shortcuts to open files - Excluded files - Most Common Files - Filter by file extension - Delimited and regex-able search - Strong encryption - SMS, Phone, or e-Mail notifications - Many, many more... Directory Crawler is a feature-rich, stand-alone program that helps you to search your entire hard drive or network for hidden or overlooked files, folders and contents, and also to locate, tag and archive them. The utility provides powerful searching tools for vast amounts of data and you can browse through your files or entire drive quickly and easily. Very handy if you have lots of files and want to save time in finding them. Directory Crawler is based on the same technology as Norton Duplicate File Cleaner and Deluxe Searcher. We have redesigned the GUI and improved the technology to offer a clean, modern user experience. Search your documents and files quickly and easily Directory Crawler is a great search tool. It can quickly search through your computer files and folders and find any possible matches. Its time-saving and reliable. You can select your search criteria, such as date/time of creation, whether to search hidden files, files or archives or where to search. Find any items with a single click It can search through any number of folders and sub-folders and show you the files, folders or archives with the matching search criteria in detail. All

you have to do is a single click on any item and you can view all the matching files, folders or archives. Easy batch operations You can batch search multiple directories, and all the files, folders or archives will be found. In the "advanced" view, you can set a priority to sort the results, so they will be found in the order you choose. You can also create text-filters, so you can quickly search for certain phrases and words in documents. Unique multi-stage search processing Directory Crawler is the only application that can find matching files and folders, as well as archiving related files into archives b7e8fdf5c8

Filecats Professional Crack + With License Code

Search through all of your folders and file contents! Filecats Professional, our new file search solution, is a cross-platform (Windows and Mac OS X) that searches for all file types (docx, xlsx, pptx, etc.) and saves search results to Excel and HTML formats. Key features: → Search the content of folders and files, within minutes → Search complete texts of any file → Create document and print directly from Filecats → Sort by number of times or count the number of files → Option to extract metadata from Adobe PDF documents → Simple! Just type a query and Filecats searches. → Search results are presented in an easy-to-read format → Search contents of files or entire folders → Sort results based on the date, author, size or type → Customized search (limit by metadata, location) → Save the search results to Excel → Export results to other applications, including PDF → Create custom search rules and use the most convenient characters for querying (wildcards, regular expressions, etc.) → Search Files or Entire Folders! → All search results are saved in the specified location or directly into a new document. → No special knowledge is needed for using this software! Every search result includes additional information, such as title, creator, size, modification date, keywords, date of last access, and more. → Also included is the possibility to export Filecats results into PDF format, which includes all metadata. → Customize the search and sort results by many settings → All items of the search result list are highlighted → Sort by Number

of Times, Number of Files, Date of last access, Creator, Name and more. → Save the search results to a specified location or directly into a new document → Save search results as well as results of the standard sort → Supported files type: *.doc, *.xls, *.ppt, *.txt → Save the search results directly into a new document → Export search results to PDF → Sort the search results by the most convenient method: by Name, Author, Creation Date, Size, Type, Tags and more → Search directly from
